

AWS™ PEDESTAL SYSTEM

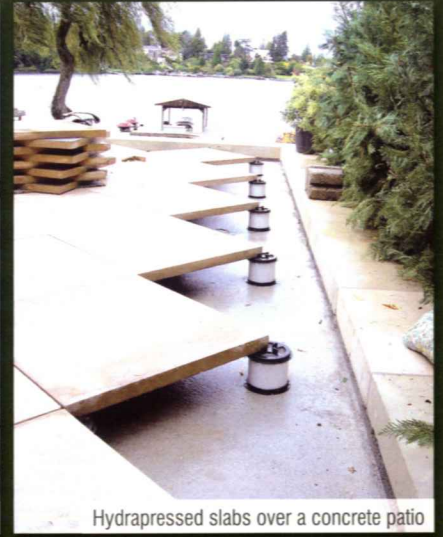

Strong, Affordable, Simple.

Concrete pavers over a PVC membrane

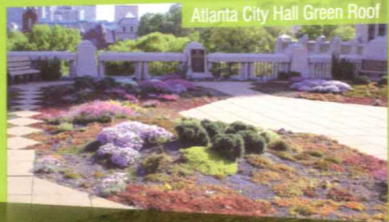

Pave-EZE Lightweight Slate Pavers over a rooftop deck

Hydrapressed slabs over a concrete patio

The AWS™ Pedestal System promotes a 'green' environment! Sustainably designed, it is constructed of fully recyclable, durable ABS & PVC plastics and 100% recycled rubber.

Atlanta City Hall Green Roof

The quick & easy 'press fit' installation of AWS™ Pedestal components requires no gluing or other attachments. Each AWS™ Pedestal holds up to 11,000 lbs. and works with nearly all kinds of pavers, slabs, and gauged stone.

AWS™ components pack in fewer boxes and weigh less than alternative pedestals, reducing the 'carbon footprint' and saving money on shipping costs!

AWS™ Pedestals adapt to all types of decks, patios, and waterproof membranes – and stairs too!

THE AWS™ PEDESTAL SYSTEM
