

# 42" StackStone Fire Pit Installation

This package builds a 16" high (4 row) fire pit with a 42" inside diameter

1. Excavate a 60" diameter, 6" deep area
2. Fill the area with 4" angular gravel (road crush) and compact to 2" below grade ensuring area is level
3. Place the first row on the prepared base with the StackStone Standard units.  
\*\*NOTE: you will use 23 units per row\*\*
4. Sweep the tops of the stones clean
5. Place the second row on top of the first row by centering the stone on the joint of the two stones below.
6. Repeat for the third row
7. For the top row use StackStone Caps. You may want to glue the top row with Concrete Adhesive. Place grill on top

**CAUTION:** Grill will become hot when in use
